

Oncologists

Oncologists

Primarily responsible for: reading & reviewing FMI reports, clinical decision making based on report findings, (occasionally) ordering tests, and (sometimes) addressing billing & coverage issues

I NEED to:

- ☐ Make evidence-based decisions about my patient's care
- ☐ Ensure that my patient has the appropriate testing
- ☐ Monitor my patient's progress on a therapy
- ☐ Know when a patient's test is on hold and why

I WANT to:

- ☐ See available and viable options for alternate care pathways
- ☐ Know if my patient is suitable for a particular therapy
- ☐ See any relevant clinical trials available for my patient
- ☐ Evidence that a therapy or course of treatment is working over time
- ☐ Know which therapies are NCCN recommended
- ☐ Know which therapies are FDA-approved
- ☐ Know when to start or stop a new therapy or care pathway

I would be DELIGHTED if:

- ☐ FMI's reports showed me actionable recommendations
- ☐ FMI's reports were short but gave me the information I need
- ☐ FMI could show a "real-time" view of my patient's progress
- ☐ All of my patients information could be available to me in one place
- ☐ I could see measurable progress over time for my patients
- ☐ I should share FMI reports with my colleagues for their opinions
- ☐ I didn't have to cut and paste portions of FMI's report into my EMR for my progress notes

Pathologists

Pathologists

Primarily responsible for: Coordination of sample procurement, biopsies, filling out the TRF in FMI kits, and sending samples & kits to FMI. For VA, paths can act as ordering oncologist.

I NEED to:

- ☐ Coordinate with my oncology colleagues
- ☐ Know when a patient is being sent to me for a biopsy or blood draw
- ☐ Obtain enough viable sample material for testing
- ☐ Ensure TRF information is filled out properly
- ☐ Mail the blood or tissue sample to FMI

I WANT to:

- ☐ Make sure I'm getting a viable tissue sample
- ☐ Have the right information from the oncologist's practice
- ☐ Have a frictionless process for obtaining and sending off samples to FMI
- ☐ See the patient's test results

I would be DELIGHTED if:

- ☐ I did not have to fill out multiple forms to coordinate ordering and sample delivery
- ☐ Coordination with oncology practices was seamless and error-free
- ☐ Mailing kits to FMI was even easier

End-to-End Journey
