PROFILE

I am a human-centered designer with several years of experience leading the user experience design, research, and design strategy of healthcare technologies and complex software suites.

I have driven research-led design and strategy across enterprise initiatives—simplifying complexity to deliver measurable results and meaningful experiences for users. My mission is to design products that empower people to live their best, healthiest lives.

EMPLOYMENT

Principal Designer, Foundation Medicine

Boston, MA

Dec 2021 – Present

Lead a cross-functional design team to create patient- and clinician-facing experiences that translate comprehensive genomic profiling into actionable clinical insights.

- Set UX strategy and product design for diagnostic reports, clinician portals, and clinical decision support—improving clarity of clinical interpretation and usability across care teams.
- Implement research-driven design processes and metrics to evaluate comprehension, adoption, and satisfaction, enabling data-informed product decisions.
- Improved oncologist comprehension of precision oncology treatments options by 25% in a study on clinical decision making driven by Foundation Medicine's online results reporting.

Lead Design Strategist, Highmark Health

Pittsburgh, PA

Jan 2019 – Nov 2021

Led research and design for enterprise initiatives focused on improving patient and clinical experiences, with emphasis on behavioral health and senior benefits navigation.

- Researched the factors behind decreasing patient engagement with mental health services, leading to a clinically-tiered strategy for services and outreach implemented across Highmark's footprint.
- Drove the discovery and conceptualization of a groundbreaking product to simplify Medicare enrollment for seniors, increasing customer conversion rates by 15%.

EDUCATION

Master of Design

Communication Planning & Information Design

Carnegie Mellon, 2012

—

Bachelor of Architecture

Woodbury University, 2004

Senior Experience Designer, PNC Bank

Pittsburgh, PA

February 2017 – January 2019

Design, research, and strategy for PNC's Innovation Team. Conducted in-depth user research and designed solutions for microbusiness owners, personal lending, and customer relationship building.

- Lead research that culminated in the development and rollout of 2 new banking roles to support microbusiness and home equity lending customers.
- Increased PNC's Corporate and Institutional Banking's customer outreach numbers for from 12% to 32% with an online banker-customer communication tool.

Lead Designer, UPMC Enterprises + GE Healthcare

Pittsburgh, PA

August 2014 – September 2016

Managed a team of designers to successfully launch GE's radiology software suite across the UPMC hospital footprint.

- Led design and research for multiple softwares that allowed radiologists to view and annotate radiologic images, interpret results, and see incoming exams in context of supporting EMR information.
- Improved radiology turnaround times by 11% across UPMC's footprint through design-led innovation.

Senior Experience Designer, athenahealth

Watertown, MA

July 2013 – August 2014

Designer for athenahealth's "Best in KLAS" award-winning patient portal.

- Led design and research efforts for population health and preventive care initiatives, resulting in increased patient adherence to treatment plans.

Senior Experience Designer, Autodesk

Waltham, MA

May 2011 – July 2013

Designed user-centered tools and services for Autodesk's building information modeling software, Revit. Employment began with an internship in the summer of 2011.

- Led design of multiple features to improve Revit's user experience for architectural and engineering professionals.
- Created a database and protocol for engaging customers in participatory agile design for the Revit UX team.
