To Whom It May Concern,

I am writing in regard to your Principal Product Designer, Growth role at Weight Watchers. I would like to introduce myself for your consideration for this opportunity.

I am a design leader with 14 years of experience in UX strategy, product design, and research. I love to solve complex problems and improve people's lives through my work as a design leader.

Currently, I am a Principal Designer at Foundation Medicine, where I lead a team of designers and researchers in creating innovative solutions for cancer care. In my previous experience, I have led multiple enterprise initiatives focused on personal banking and lending, behavioral health, Medicare coverage, radiology workflows, and I have published and patented several user experience designs for software applications. My mission is to use my skills and expertise to design products and services that empower people to live their best, healthiest lives.

Thank you for your time, and I hope to speak with you soon.

Sincerely,

A handwritten signature in black ink, appearing to read 'Erica Gatts', with a stylized flourish at the end.
